

## **Why not give it a try?**

“We heard about this product after years and years of treatment for my son with an autoimmune disorder and bacteria-related inflammation. And 8 years of being on anywhere from 1 to 3 antibiotics. We had made much progress over the years, but were still dealing with antibiotics to keep him at baseline and overnight incontinence issues. We had reached the point in treatment of - why not give (fill in the blank) a try.

I can't tell you how it makes a mom and dad feel when their 14 yo son can finally sleep dry through the night. It is directly attributable to the Polarized Water. When he drinks regularly - he is dry. If not, he has accidents. We had suspected his issues were related to cellular energy. His body was working so hard because of his health issues it just didn't have the energy left at night to send the signals to his brain to wake him up. We couldn't even wake him up at night to empty his bladder, but he no longer sleeps like a catatonic zombie, either.

We did have to ratchet the amount he drinks. Too much and his tics would flare (part of the autoimmune disorder). One bottle a day seems to be the right amount.

We've always been an all-in family when it came to my son. Any diet changes were a family affair.

So we all started to drink the Polarized Water.

My husband has struggled with kidney stones his whole life. Within a couple weeks of starting the Polarized Water he had a big stone attack and for the first time EVER passed a stone. I knew at that point this product actually does something. So we kept with it and that's when my son began to see benefits. Beyond that, my husband is in remission from cancer and will continue on the water to support his ongoing regiment to stay healthy.

My other son struggled with warts! Bad! Multiple years and even surgery on his foot that just made it worst. I told him to start drinking the water - he is 22 and had to admit to me the other day when he reported his warts are all dying off - that his mom was right!

Myself, I experience headaches from the water. But - my mother was just diagnosed with a memory disorder and her mother also had it. I had already noticed brain fog for me in recent years so I'm using the water along with ion foot bath detox to see if I can flush out the brain plaque that causes the memory disorder. Maybe that's why I get headaches? Who knows - but I'm willing try. I definitely feel more clarity.

Look - many will consider this stuff hogwash. But when you're like me - reaching the point of 'what does it hurt to try' and then you actually see results... I don't really care if people think that. It's my experience. I'm not a nut case. I'm just a mom and wife that wants to make everything right for my family. I'll go to my grave trying everything possible for them and their health.”
